

CORONA: *the hot atmosphere around the sun. It becomes visible as a halo of light during a complete solar eclipse. Corona also means "crown".*

With this artwork I visualize what happens: helping hands that are reaching out to other people in a time when we need each other. And that is precisely why I see that colorful atmosphere of warmth and light emerging. Helping each other, together, reconnected, as a crown on the solar eclipse that we now sometimes experience.
